CURTIS POLLED HEREFORDS

Dear Fellow Cattlemen & Friends:

We would like to extend an invitation to each of you to be with us on Feb. 19, 2011 for our 59th Annual Sale at Bales CCC, Huron, SD.

The Curtis program has been centered on producing two-year old bulls for the commercial cattleman. Our herd bulls are selected after much research and we demand that they are backed by exceptional ancestors. The cow herd is based on strong cow families which are built by keeping most all of our top end heifers to put back into the herd. Bulls are our business, but the cows are what keep us in business.

We have stressed a balanced trait program with superior calving ease while not sacrificing performance. Functional, docile cattle with udder quality, mothering ability, longevity, fertility, and carcass value are also at the top of our “**must**” list. You may note that the sale offering all have a 205-day weight ratio of 100 or more which indicates they were in the top half of their calf crop at weaning time.

The Harris Ranch three-year study has been completed comparing Angus sired calves to Hereford sired calves out of Angus cows. Overall from birth through harvest, the Hereford sired calves provided a net return of \$30 per head over the Angus sired calves. This does not include the maternal advantages of the baldie female. Pregnancy rates for the baldie females were 7% higher than the straight Angus. Final reports of the study are available. Please feel free to request a copy.

We want to thank all our loyal customers for their support over the years and we look forward to visiting with you sale day. If we can be of any assistance, please feel free to call on us.

LARRY & CAROL GILDEMASTER
38230 214th Street
Virgil, South Dakota 57379

In Memory

*This past October we lost our mother
and mother-in-law. Hazel Curtis
was a truly exceptional lady who worked beside her
husband, Frank, for over 40 years raising their
beloved Herefords. Whenever Frank would get
discouraged, she was there to provide encouragement
and hope. She never missed one of our
58 sales during her 95 years.*

*We Miss her Dearly and Dedicate
our 59th Annual Sale
To Her Memory.*

~ TERMS AND CONDITIONS ~

1. Bids may be submitted to any of the sales staff.
2. Each animal will be sold separately to the highest bidder.
3. The auctioneer will settle any dispute as to bids.
4. Terms of sale are cash.
5. Health Certificates furnished.
6. Known blemishes, if any, will be noted in catalog.
7. All two-year old bulls will have passed a fertility test. We recommend the yearling bulls be tested prior to turn out.
8. We will keep the two-year old bulls at no charge until April 1st.
9. We will assist in delivery.
10. The EPD's in the catalog are from the Spring 2011 analysis.
11. Any person attending the sale does so at his own risk, and we assume no liability, legal or otherwise, for any accident that may occur.

~ GUARANTEE ~

BULLS: Satisfaction guaranteed on all bulls for first breeding season. We will require that the bull be returned to us in a salvageable condition and we will replace him with a bull of similar value.

REGISTERED HEIFERS Guaranteed under the terms recommended by the American Hereford Association.

Please Note: Extreme care has been taken in copying each and every pedigree to avoid errors. We are not to be held responsible for any error which might appear and which is beyond our control.

PLEASE BRING THIS CATALOG WITH YOU THE DAY OF SALE.

Lot 2 is an outstanding herd sire prospect. A complete calf with a very nice Bennett M116 daughter for his dam, and Traildust for his sire. 30X has been a standout since birth. He is conservatively marked with complete eye and scrotal pigment. His EPDs rank him in the top 5% of the breed for WW, YW, and CHB. The top 10% for CEM and BMI. The top 20% for CED, M&G, SC, and CEZ. A maternal sister was one of our top selling heifers in our 2010 sale.

DEFINING EPD (EXPECTED PROGENY DIFFERENCES) TERMS

EPD's are a prediction of how an animal will perform compared to other animals in the Hereford breed. They are not to be used in comparing animals of other breeds.

CED (Calving Ease Direct) More positive EPDs are favorable and indicate easier calving for females calving at two years of age.

BW (Birth Weight) Expressed in pounds for progeny comparison between animals. The only EPD that the advantage is expressed in a lower number.

WW (Weaning Weight) Expressed in pounds when comparing an animal's progeny for adjusted 205 day weights.

YW (Yearling Weight) Expressed in pounds when comparing an animal's progeny for adjusted 365 day weights.

MM (Maternal Milk) The milking ability of a sire's daughters expressed in pounds of calf weaned.

REA (Ribeye Area) Reflects differences in size of an adjusted 365 day ribeye measurement.

IMF (Marbling) Reflects differences in percent of marbling based on adjusted 365 day IMF carcass measurement.

BMI (Baldy Maternal Index) A maternally focused index expressed in dollars returned from mating a Hereford bull to Black cows.

CEZ (Calving Ease Index) A general index that is specifically designed to be used in a heifer program.

CHB (Certified Hereford Beef Index) A terminal sire index that is built on a production system where Hereford bulls sire calves for the CHB market.

Lot 46 is the first Bennett M116 daughter we have offered for sale. She has a very nice Dam of Distinction which we purchased in the Dubois dispersion and has ratioed 110 on 7 calves.

COMMERCIAL HEIFERS

We will be offering a select group of approximately 60 commercial yearling heifers. The heifers are Herefords and most were born in March of 2010. They have been Bangs Vaccinated and have had their fall shots with boosters in accordance with the Pfizer Select Vac program. They were also poured for external and internal parasites.

We plan to offer them in groups of approximately fifteen with gate cut allowed if you would want less. These heifers will not be registered, although they are sired by our herd bulls and out of registered cow.
